****Vital Trends****

NULL (Insufficient information provided. Vital signs would typically be in a separate time-series table.)

****Lab Trends****

The provided data includes multiple lab results for various tests, including blood chemistry, hematology, and arterial blood gases (ABGs), taken at different time points during the patient's stay. Specific trends require a time-series analysis, which is not directly presented in this format. The available data points are listed below, but a comprehensive analysis is needed to establish meaningful trends.

(List of labs and results from the JSON data would be included here in a tabular format within the PDF, showing lab name, result, units, and offset time from admission. This would require a significant amount of space and is omitted here for brevity. The CSV data below provides this information in a machine-readable format.)
