****Vital Trends****

NULL (No vital sign data provided)

****Lab Trends****

The following laboratory test results were recorded for the patient during their ICU stay. All times are relative to the unit admission time. Note that the exact date is missing from the provided data. Therefore, only time offsets from unit admission are reported.

* **Glucose:** A bedside glucose measurement of 181 mg/dL was obtained at 175 minutes post unit admission. Subsequent measurements showed 186 mg/dL at 729 minutes, 141 mg/dL at 433 minutes, and 114 mg/dL and 105 mg/dL at 1138 and 1318 minutes respectively. This indicates fluctuations in glucose levels during the stay. * **Hemoglobin (Hgb):** A hemoglobin level of 10.1 g/dL was measured at 1138 minutes post unit admission. * **Hematocrit (Hct):** A hematocrit of 29.5% was measured at 1138 minutes post unit admission. * **White Blood Cell Count (WBC):** A WBC count of 13.2 K/mcL was recorded at 1138 minutes post unit admission. This suggests potential infection or inflammation. * **Platelets:** Platelet count was 255 K/mcL at 1138 minutes post unit admission. * **Other Chemistry and Hematology values:** Several other chemistry and hematology values were obtained at 1138 minutes post unit admission including: Albumin (2.6 g/dL), Calcium (8.2 mg/dL), Alkaline Phosphatase (58 Units/L), ALT (22 IU/L), AST (21 IU/L), Total Bilirubin (0.2 mg/dL), Creatinine (0.72 mg/dL), BUN (22 mg/dL), Potassium (4.5 mmol/L), Chloride (105 mmol/L), Bicarbonate (26 mmol/L), Phosphate (2.8 mg/dL), Magnesium (2.1 mg/dL), Total Protein (6.4 g/dL), MCV (100 fL), MCH (34.1 pg), MCHC (34.2 g/dL), MPV (9 fL), RDW (13.4%). Anion gap was 8 at 1138 minutes. Troponin-I levels were <0.02 ng/mL at 487 and 838 minutes.
