

****Medical Report: Patient 008-10026****

****1. Patient Information****

* **Patient Unit Stay ID:** 1048833 * **Patient Health System Stay ID:** 776892 * **Unique Patient ID:** 008-10026 *
Gender: Male * **Age:** 56 * **Ethnicity:** Caucasian * **Hospital ID:** 188 * **Ward ID:** 451 * **Unit Type:** Neuro
ICU * **Unit Admit Time:** 04:03:00 (2015) * **Unit Admit Source:** Emergency Department * **Unit Discharge Time:**
23:56:00 (2015) * **Unit Discharge Location:** Floor * **Unit Discharge Status:** Alive * **Hospital Admit Time:** 01:12:00
(2015) * **Hospital Admit Source:** Emergency Department * **Hospital Discharge Year:** 2015 * **Hospital Discharge
Time:** 22:37:00 (2015) * **Hospital Discharge Location:** Other * **Hospital Discharge Status:** Alive * **Admission
Height:** 182.9 cm * **Admission Weight:** 135.8 kg * **Discharge Weight:** NULL * **APACHE Admission Dx:** CVA,
cerebrovascular accident/stroke

****2. History****

NULL (Insufficient data provided)

****3. Diagnoses****

* **Primary Diagnosis:** Stroke (neurologic|disorders of vasculature|stroke, ICD-9 code: 436, I67.8) * **Other Diagnosis:**
Uncontrolled Hypertension (cardiovascular|vascular disorders|hypertension|uncontrolled, ICD-9 code: 401.9, I10)

****4. Treatments****

NULL (Insufficient data provided)

****5. Vital Trends****

NULL (Insufficient data provided. While the physical exam includes some vital signs at one point in time, a trend requires multiple measurements over time.)

****6. Lab Trends****

The provided lab data shows multiple blood tests performed at various times during the patient's stay. Specific trends will be detailed in the visualization and summary table sections. Key lab values monitored included: Bicarbonate (mmol/L), Creatinine (mg/dL), BUN (mg/dL), Glucose (mg/dL), Potassium (mmol/L), Chloride (mmol/L), various complete blood count (CBC) parameters (Hgb, Hct, MCV, MCH, MCHC, RDW, Platelets, WBC), and magnesium (mg/dL). Note that some values are missing for specific tests at certain time points.

****7. Microbiology Tests****

NULL (Insufficient data provided)

****8. Physical Examination Results****

The physical exam, performed at 3 minutes post-unit admission, revealed the following:

* **General:** Healthy appearing, obese, not in acute distress. * **Neurological:** GCS score of 15 (Eyes: 4, Verbal: 5, Motor: 6), normal LOC, oriented x3, calm and appropriate affect, normal sensation, normal motor function, abnormal cranial nerves. * **Head and Neck:** Normal neck mobility, equal pupils reacting to light, normal pharynx. * **Pulmonary:** Clear to auscultation, not intubated. * **Cardiovascular:** Normal pulses, no murmurs, S1 and S2 normal heart sounds. *

****Gastrointestinal:**** Normal bowel sounds.

****Note:**** This report is based on the limited data provided. A more complete history and detailed treatment information would enhance the comprehensiveness of this report. The absence of time-series data for vital signs prevents the generation of vital sign trends. The lab data is partially incomplete, with some missing values. Further information is required for a complete assessment.
