****2. History****

Insufficient data provided to generate a detailed patient history. The report only includes admission and discharge information. Further details regarding the patient's medical history prior to admission are needed. This section would typically include information regarding past medical conditions, surgeries, allergies, current medications, family history, and social history. The lack of a primary admission diagnosis also limits the context for understanding the patient's history.

****3. Diagnoses****

NULL. No diagnoses are explicitly listed in the provided data. A complete medical report would include a list of the patient's diagnoses during their ICU stay, including both primary and secondary diagnoses. This information is crucial for understanding the reason for admission and the patient's overall clinical picture.

****4. Treatments****

NULL. No treatment information is provided in the given dataset. A detailed account of medical interventions such as medications administered, procedures performed, and respiratory support provided, would be included in this section of a complete medical report.

****5. Vital Trends****

NULL. No vital sign data (heart rate, blood pressure, respiratory rate, temperature, oxygen saturation) is available in the supplied data. A complete report would include time-series data for these parameters, plotted graphically to show trends over the course of the ICU stay.

****6. Lab Trends****

The following lab results were recorded (all values were obtained at approximately the same time, -333 minutes from unit admission):

***Sodium:** 141 mmol/L ***AST (SGOT):** 26 U/L ***ALT (SGPT):** 31 U/L ***Albumin:** 3.8 g/dL ***Total Bilirubin:** 0.2 mg/dL ***Calcium:** 8.1 mg/dL ***Total Protein:** 7.2 g/dL ***WBC x 1000:** 7.8 K/mcL ***Bicarbonate:** 24 mmol/L ***RDW:** 13.4 % ***Chloride:** 104 mmol/L ***RBC:** 4.11 M/mcL ***Anion Gap:** 13 ***Hct:** 39 % ***Creatinine:** 0.75 mg/dL ***MCV:** 95 fL ***Glucose:** 116 mg/dL ***MCH:** 31.1 pg ***Alkaline Phos.:** 54 U/L ***Hgb:** 12.8 g/dL ***BUN:** 5 mg/dL ***Platelets x 1000:** 212 K/mcL ***Potassium:** 2.8 mmol/L ***Ethanol:** 168 mg/dL ***MCHC:** 33 g/dL

Note: These are single time-point measurements. Trends cannot be determined without additional data collected over time.

****7. Microbiology Tests****

NULL. No microbiology test results are included in the provided data. This section would typically include results from blood cultures, urine cultures, and other relevant cultures to identify any infections.

****8. Physical Examination Results****

* **Physical Exam Performed:** Yes * **GCS Score:** 15 (Eyes: 4, Verbal: 5, Motor: 6) * **Admission Weight:** 65.6 kg *
Intake (ml): 1900 * **Output (ml):** 1300 * **Net Fluid Balance (ml):** +600

The physical exam was performed and documented using a structured format. More detailed findings from the physical examination are needed for a comprehensive report. The provided data only shows a limited set of measurements.
