****Vital Trends****

NULL (Insufficient information provided)

****Lab Trends****

The provided data includes a series of laboratory test results taken at approximately the same time (715 minutes from unit admission). Additional data points across time would be necessary to establish true trends. However, a snapshot of the lab values at this point reveals the following:

* **Hematology:** Hemoglobin (Hgb) was 12.5 g/dL, Hematocrit (Hct) was 36.9%, Mean Corpuscular Volume (MCV) was 98.9 fL, Mean Corpuscular Hemoglobin Concentration (MCHC) was 33.9 g/dL, Mean Corpuscular Hemoglobin (MCH) was 33.5 pg, Red Blood Cell Distribution Width (RDW) was 12.8%, Red Blood Cell (RBC) count was 3.73 M/mcL, White Blood Cell (WBC) count was 4.6 K/mcL, Platelet count was 62 K/mcL. Differential counts included: Lymphocytes (21.3%), Monocytes (7.2%), Eosinophils (1.5%), Basophils (0.4%), and Polymorphonuclear leukocytes (69.6%). * **Chemistry:** Blood Urea Nitrogen (BUN) was 6 mg/dL, Creatinine was 0.71 mg/dL, Glucose was 129 mg/dL, Sodium was 140 mmol/L, Potassium was 3.5 mmol/L, Chloride was 110 mmol/L, Bicarbonate was 24 mmol/L, and Anion Gap was 6. * **Misc:** Bedside glucose measurements were also recorded at various times, showing significant fluctuation (59, 129, 231, 261, 274 mg/dL).

****Microbiology Tests****

NULL (No microbiology data provided)

****Physical Examination Results****

NULL (Insufficient information provided)

****Note:**** This report is based solely on the limited data provided. A comprehensive medical report would require significantly more information, including complete medical history, physical examination findings, detailed treatment plans,

and a full timeline of vital signs and laboratory results.
