

****Patient Information****

Patient Unit Stay ID: 662091 Unique Patient ID: 006-10108 Gender: Female Age: 76 Ethnicity: Caucasian Hospital Admit Time: 2014-XX-XX 20:26:00 Hospital Admit Source: Emergency Department Hospital Discharge Time: 2014-XX-XX 20:15:00 Hospital Discharge Location: Rehabilitation Hospital Discharge Status: Alive Unit Type: Med-Surg ICU Unit Admit Time: 00:19:00 Unit Admit Source: Emergency Department Unit Discharge Time: 00:31:00 Unit Discharge Location: Step-Down Unit (SDU) Unit Discharge Status: Alive Admission Weight: 79.6 kg Discharge Weight: 79.6 kg Admission Height: 170 cm

****History****

Insufficient data provided for a detailed patient history. The admission diagnosis indicates a cerebrovascular accident (CVA) or stroke. Further information on the patient's medical history prior to admission is needed to complete this section.

****Diagnoses****

Diagnosis ID: 12384811 Patient Unit Stay ID: 662091 Active Upon Discharge: True Diagnosis Offset (minutes from unit admit): 22 Diagnosis String: neurologic[disorders of vasculature]stroke ICD-9 Code: 436, I67.8 Diagnosis Priority: Primary

****Treatments****

Insufficient data provided to detail treatments administered during the ICU stay. This section requires information on medications, procedures, and therapies.

****Vital Trends****

The following vital signs were recorded:

* Heart Rate (HR) Current, Lowest, Highest: 69 bpm * Blood Pressure (BP) Systolic Current, Lowest, Highest: 149 mmHg * Blood Pressure (BP) Diastolic Current, Lowest, Highest: 79 mmHg * Respiratory Rate (Resp) Current, Lowest, Highest: 17 breaths/min * Oxygen Saturation (O2 Sat%) Current, Lowest, Highest: 95%

Insufficient data is provided to create detailed vital sign trends over time. To generate trends, time-series data for heart rate, blood pressure, respiratory rate, and oxygen saturation are required at multiple time points throughout the ICU stay.

****Lab Trends****

The following laboratory results were obtained:

* Glucose: 222 mg/dL * AST (SGOT): 15 IU/L * ALT (SGPT): 22 IU/L * WBC x 1000: 20 K/mcL * Anion Gap: 10 * MCHC: 33.8 g/dL * Sodium: 137 mmol/L * Platelets x 1000: 275 K/mcL * Calcium: 8.9 mg/dL * MCH: 31.6 pg * Creatinine: 0.92 mg/dL * Potassium: 3.9 mmol/L * Total Cholesterol: 138 mg/dL (obtained at 690 minutes post-admit) * Triglycerides: 215 mg/dL (obtained at 690 minutes post-admit) * HDL: 74 mg/dL (obtained at 690 minutes post-admit) * Bicarbonate: 23 mmol/L * Albumin: 3.2 g/dL * Hct: 39.3 % * -polys: 87 % * Total Bilirubin: 0.4 mg/dL * Hgb: 13.3 g/dL * BUN: 24 mg/dL * MCV: 93 fL * PT: 12.1 sec * -lymphs: 8 % * Chloride: 104 mmol/L * RBC: 4.21 M/mcL * Bedside glucose (multiple readings): 164, 199, 118, 172 mg/dL * PTT: 23 sec * -basos: 0 % * -eos: 0 % * -monos: 4 % * PT - INR: 0.9 * Troponin - I: <0.02 ng/mL * FiO2: 33 %

Insufficient data to show trends over time. Multiple lab results at different time points are needed to demonstrate trends.

****Microbiology Tests****

NULL. No microbiology test data provided.

****Physical Examination Results****

Physical Exam Performed: Yes (Structured) Heart Rate: 69 bpm Blood Pressure (Systolic): 149 mmHg Blood Pressure (Diastolic): 79 mmHg Respiratory Rate: 17 breaths/min Oxygen Saturation: 95% Weight (Admission): 79.6 kg Glasgow Coma Scale (GCS): Estimated as 15 (4+5+6), but estimated due to medications.

The physical exam findings suggest a relatively stable patient upon admission. However, more comprehensive physical exam data is needed for a complete assessment.
