

****Patient Information****

Patient Unit Stay ID: 558719 Unique Patient ID: 006-108476 Gender: Female Age: 76 Ethnicity: Caucasian Admission Height (cm): 157 Admission Weight (kg): 117 Discharge Weight (kg): 116.8 Hospital Admit Time: 04:27:00 Hospital Admit Source: Emergency Department Hospital Discharge Year: 2014 Hospital Discharge Time: 19:25:00 Hospital Discharge Location: Home Hospital Discharge Status: Alive Unit Type: Med-Surg ICU Unit Admit Time: 06:26:00 Unit Admit Source: Emergency Department Unit Visit Number: 1 Unit Stay Type: admit Unit Discharge Time: 20:21:00 Unit Discharge Location: Step-Down Unit (SDU) Unit Discharge Status: Alive

****History****

Admission Diagnosis: Emphysema/bronchitis. Further details regarding the patient's medical history prior to admission are not provided in the dataset. A more complete history would include details on the onset and progression of symptoms, previous hospitalizations, family history, and social history. This information is crucial for a comprehensive understanding of the patient's condition.

****Diagnoses****

Diagnosis ID: 12037024 Patient Unit Stay ID: 558719 Active Upon Discharge: True Diagnosis Offset (minutes): 509
Diagnosis String: pulmonary|respiratory failure|acute respiratory failure ICD-9 Code: 518.81, J96.00 Diagnosis Priority: Primary

Diagnosis ID: 12476516 Patient Unit Stay ID: 558719 Active Upon Discharge: False Diagnosis Offset (minutes): 14
Diagnosis String: pulmonary|respiratory failure|acute respiratory failure ICD-9 Code: 518.81, J96.00 Diagnosis Priority: Primary

****Treatments****

Treatment ID: 26708092 Patient Unit Stay ID: 558719 Treatment Offset (minutes): 14 Treatment String: pulmonary|ventilation and oxygenation|non-invasive ventilation Active Upon Discharge: False

Further details on treatments administered during the ICU stay are missing. A complete treatment section would list all medications, therapies, and procedures provided, along with dosages, routes of administration, and response to treatment. This lack of detail limits the ability to assess the effectiveness of the care provided.

****Vital Trends****

NULL. No vital sign data is available in the provided dataset.

****Lab Trends****

The dataset includes a wide range of laboratory tests performed during the patient's stay, both before and after ICU admission. These tests include hematological parameters (Hgb, Hct, RBC, MCV, MCH, MCHC, RDW, Platelets, WBC), chemistry panels (glucose, calcium, chloride, bicarbonate, potassium, sodium, total protein, albumin, BUN, creatinine, AST, ALT, total bilirubin, alkaline phosphatase, anion gap), and other miscellaneous tests (BNP, bedside glucose). Specific trends cannot be determined without time-series data, which is missing from the provided dataset.

****Microbiology Tests****

NULL. No microbiology test data is provided.

****Physical Examination Results****

A physical exam was performed, as indicated by the "Performed - Structured" entry. The systolic blood pressure was recorded as 131 mmHg. The diastolic blood pressure was 86 mmHg. A Glasgow Coma Scale (GCS) score of 15 (4, 5, 6) was documented. More extensive information on the physical examination findings is needed for a more complete picture of the patient's condition. The provided data only offers a snapshot of the exam.
