****Vital Trends****

NULL (Insufficient data provided to generate vital sign trends. Requires time-series data on heart rate, blood pressure, respiratory rate, temperature, etc.)

****Lab Trends****

The provided lab data shows multiple blood tests performed at different time points during the patient's ICU stay. The time offsets are relative to the unit admission time. The following lab values are available:

* **Hematology:** WBC x 1000 (K/mcL), -basos (%), -eos (%), -monos (%), -lymphs (%), -polys (%), RBC (M/mcL), Hgb (g/dL), Hct (%), MCV (fL), MCH (pg), MCHC (g/dL), RDW (%). * **Chemistry:** BUN (mg/dL), bicarbonate (mmol/L), chloride (mmol/L), sodium (mmol/L), potassium (mmol/L), alkaline phos. (Units/L), total protein (g/dL), albumin (g/dL), glucose (mg/dL), ALT (SGPT) (Units/L), AST (SGOT) (Units/L), total bilirubin (mg/dL), magnesium (mg/dL), anion gap (mmol/L), calcium (mg/dL), BNP (pg/mL).

Analysis of these trends requires a time-series visualization (see Visualization section). Significant variations from normal ranges and trends within specific lab values should be further investigated to determine their clinical significance and contribution to the patient's condition.

****Microbiology Tests****

NULL (No microbiology data provided)

****Physical Examination Results****

NULL (Insufficient data provided. Requires documented physical examination findings.)

****Note:**** This report is based solely on the provided data. Additional medical records and clinical information are required for a complete and accurate assessment of the patient's condition and care during their ICU stay.
