****6. Lab Trends****

The provided lab data includes various blood tests (hematology and chemistry) performed at multiple time points during the patient's stay. Specific trends can't be fully described without time-series data, but the data includes values for MCV, Hgb, Hct, WBC, RDW, Chloride, BUN, Calcium, ALT, total protein, bicarbonate, Potassium, Platelets, MCH, MCHC, and Troponin-I. Some values are missing or represented with '<0.02' (Troponin-I) indicating values below the detection limit.

****7. Microbiology Tests****
