

****Patient Information****

* **Patient Unit Stay ID:** 176730 * **Unique Patient ID:** 002-1195 * **Gender:** Male * **Age:** 72 * **Ethnicity:** Caucasian * **Admission Diagnosis:** Rhythm disturbance (atrial, supraventricular) * **Admission Height (cm):** 177.8 * **Admission Weight (kg):** 98.9 * **Discharge Weight (kg):** 99 * **Hospital Admission Time:** 2015-XX-XX 19:48:44 * **Hospital Discharge Time:** 2015-XX-XX 16:44:00 * **Unit Admission Time:** 2015-XX-XX 19:52:00 * **Unit Discharge Time:** 2015-XX-XX 15:42:00 * **Unit Discharge Status:** Expired * **Hospital Discharge Status:** Alive * **Unit Type:** Med-Surg ICU * **Hospital Discharge Location:** Home * **Unit Discharge Location:** Death

****Medical History****

NULL (Insufficient data provided)

****Diagnoses****

* **Admission Diagnosis:** Rhythm disturbance (atrial, supraventricular) NULL (Insufficient data provided to list other diagnoses)

****Treatments****

NULL (Insufficient data provided)

****Vital Trends****

NULL (Insufficient data provided. Vital signs are not included in the provided JSON.)

****Lab Trends****

The provided lab data shows multiple blood tests performed at different times during the patient's stay. The data includes hemoglobin (Hgb), hematocrit (Hct), white blood cell count (WBC), platelets, red blood cell count (RBC), mean corpuscular volume (MCV), mean corpuscular hemoglobin (MCH), mean corpuscular hemoglobin concentration (MCHC), red cell distribution width (RDW), prothrombin time (PT), partial thromboplastin time (PTT), PT-INR, troponin-I, BUN, creatinine, glucose, sodium, potassium, chloride, bicarbonate, TSH, and differential white blood cell counts (-monos, -lymphs, -eos, -basos, -polys). Specific trends cannot be definitively determined without timestamps and more complete data. However, there are two sets of blood tests, one at approximately 878 minutes and another at approximately 2368 minutes post-unit admission. Comparing these time points may reveal changes in the patient's condition.

****Microbiology Tests****

NULL (Insufficient data provided)

****Physical Examination Results****

A structured physical exam was performed. The recorded systolic blood pressure was 143 mmHg, and the diastolic blood pressure was 105 mmHg. The patient's admission weight was 98.9 kg. A Glasgow Coma Scale (GCS) was performed, resulting in scores of 4 (Eyes), 5 (Verbal), and 6 (Motor). This suggests a level of altered consciousness or neurological impairment. Further details regarding the physical exam are unavailable due to limited data.
