

****Patient Information****

* **Patient Unit Stay ID:** 166864 * **Unique Patient ID:** 002-10672 * **Gender:** Male * **Age:** 51 * **Ethnicity:** Caucasian * **Hospital Admission Time:** 2015-XX-XX 19:05:00 * **Hospital Admission Source:** Emergency Department * **Hospital Discharge Time:** 2015-XX-XX 16:05:00 * **Hospital Discharge Location:** Home * **Hospital Discharge Status:** Alive * **Unit Type:** Med-Surg ICU * **Unit Admission Time:** 2015-XX-XX 19:38:00 * **Unit Admission Source:** Emergency Department * **Unit Discharge Time:** 2015-XX-XX 20:06:00 * **Unit Discharge Location:** Floor * **Unit Discharge Status:** Alive * **Admission Weight:** 68.8 kg * **Discharge Weight:** 70 kg * **Admission Height:** 172.7 cm * **Admission Diagnosis:** Drug withdrawal

****Medical History****

NULL (Insufficient data provided)

****Diagnoses****

* Drug withdrawal (Admission Diagnosis)

****Treatments****

NULL (Insufficient data provided)

****Vital Trends****

NULL (Insufficient data provided)

****Lab Trends****

The provided lab data includes multiple blood tests conducted at different time points during the patient's ICU stay. The data shows a trend of decreasing potassium levels from 3.6 mmol/L at -203 minutes from unit admission to 3.1 mmol/L at 3743 minutes, followed by a slight increase to 3.7 mmol/L at 4648 and 5272 minutes. Similarly, sodium levels show some fluctuation, with initial readings around 140-143 mmol/L and a later reading of 140 mmol/L. The albumin levels also show a noticeable change from 3.8 g/dL at -203 minutes to 3.5 g/dL at 2540 minutes. AST (SGOT) and ALT (SGPT) levels are elevated at multiple time points, indicating potential liver damage. These values were 181 and 121 Units/L at -203 minutes respectively, and 137 and 126 Units/L at 2540 minutes. The complete blood count (CBC) reveals fluctuations in various parameters, including RBC, Hct, Hgb, MCV, MCH, MCHC, and RDW. Platelet counts were also monitored and show fluctuations between 70 and 113 K/mcL. The anion gap showed some variation, ranging from 11 to 14 mmol/L. The patient also had two drug level tests - acetaminophen and salicylate, with acetaminophen being below the detection limit (<2 mcg/mL) and salicylate being <1.7 mg/dL. Bicarbonate levels were also monitored and show values ranging from 24 to 28 mmol/L.

****Microbiology Tests****

NULL (Insufficient data provided)

****Physical Examination Results****

* **Physical Exam Performed:** Yes (Performed - Structured) * **Admission Weight:** 68.8 kg * **Current Weight:** 68.9 kg * **Weight Change:** +0.1 kg * **Glasgow Coma Scale (GCS) Score:** 14 (Eyes: 4, Verbal: 4, Motor: 6)

****Note:**** The time offsets in the lab data indicate the time elapsed since unit admission. Negative offsets suggest lab values drawn before official unit admission. More detailed information on the patient's medical history and treatments

would greatly enhance the completeness of this report. Specific dates are missing from the provided data, which limits the contextual information.
