****Laboratory Trends****

The provided data includes several chemistry lab results obtained at 989 minutes and 133 minutes post unit admission. A summary of these results is as follows:

* **Sodium (mmol/L):** 139 at 989 minutes * **Potassium (mmol/L):** 3.9 at 989 minutes * **Chloride (mmol/L):** 103 at 989 minutes * **Calcium (mg/dL):** 8.8 at 989 minutes * **Creatinine (mg/dL):** 1.48 at 989 minutes * **Bicarbonate (mmol/L):** 28 at 989 minutes * **Anion Gap (mmol/L):** 12 at 989 minutes * **Glucose (mg/dL):** 102 at 989 minutes * **BUN (mg/dL):** 28 at 989 minutes * **Bedside Glucose (mg/dL):** 85 at 133 minutes

These results represent a single time point and do not show trends over time. Further data is needed to establish temporal relationships and patterns in the patient's laboratory values. The values themselves appear to be within the typical ranges for most of these analytes, but further context is required for complete interpretation.
