\*\*3. Diagnoses\*\*

The patient received multiple diagnoses during their ICU stay, all related to cardiovascular arrhythmias, specifically atrial fibrillation. These diagnoses were entered at various times during the stay, with the primary diagnosis being atrial fibrillation (ICD-9 codes: 427.31, I48.0). The diagnoses were not active upon discharge.

\* \*\*Diagnosis 1 (Diagnosis ID: 10845805):\*\* cardiovascular|arrhythmias|atrial fibrillation (427.31, I48.0), Primary, Entered at 12 minutes post-admission. Inactive upon discharge. \* \*\*Diagnosis 2 (Diagnosis ID: 12404174):\*\* cardiovascular|arrhythmias|atrial fibrillation (427.31, I48.0), Primary, Entered at 325 minutes post-admission. ## \*\*4. Treatments\*\*

The patient received several treatments during their ICU stay, primarily focused on managing cardiovascular arrhythmias. These included various antiarrhythmics (specifically Class IV antiarrhythmics like diltiazem) and digoxin. None of these treatments were active upon discharge. The treatments administered were:

\*\*6. Lab Trends\*\*

The provided lab data includes multiple blood tests performed at various times during the patient's stay. These tests include complete blood count (CBC) with differential, basic metabolic panel (BMP), and cardiac markers (Troponin-I). The data shows fluctuations in several parameters, requiring further analysis to determine significance.

Specific lab values are detailed in the CSV data section below. Note that some values are missing or denoted as '<0.02'.

\*\*7. Microbiology Tests\*\*

NULL (Insufficient data provided)

\*\*8. Physical Examination Results\*\*

A structured physical exam was performed at 7 minutes post-admission. The systolic blood pressure was recorded at 100 mmHg (both current, highest, and lowest readings). The diastolic blood pressure was 61 mmHg (current, highest, and lowest readings). The patient's admission weight was 86.8 kg. The Glasgow Coma Scale (GCS) score was 15 (Eyes: 4, Verbal: 5, Motor: 6).
