Patient Information:

Patient ID: 002-12056 Patient Unit Stay ID: 198630 Patient Health System Stay ID: 173545 Gender: Female Age: 47 Ethnicity: Caucasian Hospital ID: 60 Ward ID: 83 Admission Height (cm): 167.6 Admission Weight (kg): 49.4 Discharge Weight (kg): NULL Hospital Admission Time: 04:24:38 Hospital Admission Source: Floor Hospital Discharge Year: 2015 Hospital Discharge Time: 19:00:00 Hospital Discharge Location: Skilled Nursing Facility Hospital Discharge Status: Alive Unit Type: Med-Surg ICU Unit Admission Time: 02:41:00 Unit Admission Source: Floor Unit Visit Number: 3 Unit Stay Type: readmit Unit Discharge Time: 02:43:00 Unit Discharge Location: Step-Down Unit (SDU) Unit Discharge Status: Alive Admission Diagnosis: NULL

History:

Insufficient data provided to generate a detailed patient history. The available data only provides demographic information and admission/discharge times and locations. Further information regarding past medical history, presenting complaints, family history, and social history is needed to complete this section.

Diagnoses:

NULL. No diagnoses are listed in the provided data.

Treatments:

NULL. No treatment information is available in the provided dataset. This section would typically include details on medications administered, procedures performed, and other therapeutic interventions.

Vital Trends:

NULL. No vital sign data (heart rate, blood pressure, respiratory rate, temperature, oxygen saturation) is included in the provided dataset. This section would normally present a graphical or tabular representation of vital sign trends over time.

Lab Trends:

NULL. No laboratory test results are provided. This section would typically contain a table showing the results of blood tests, urine tests, and other laboratory investigations, along with their corresponding timestamps.

Microbiology Tests:

NULL. No information on microbiology tests (e.g., blood cultures, urine cultures) is available.

Physical Examination Results:

NULL. No physical examination findings are provided in the dataset. This section would usually describe the patient's physical condition at the time of admission and during the ICU stay, including observations of vital signs, neurological status, cardiovascular status, respiratory status, abdominal examination, and skin examination. It should also include any significant abnormal findings.
