Lab Trends:

The provided data includes a snapshot of laboratory results obtained 177 minutes after unit admission. The results are as follows:

* **Platelets:** 280 K/mcL * **RDW:** 13 % * **MCHC:** 33.2 g/dL * **RBC:** 4.04 M/mcL * **Hgb:** 12.1 g/dL * **Hct:** 36.4 % * **MCV:** 90.1 fL * **MCH:** 30 pg * **Creatinine:** 0.65 mg/dL (obtained 207 minutes post-admission) * **WBC:** 13.5 K/mcL

These results represent a single time point and do not allow for the creation of trends. Further data points over time are needed to analyze trends in these lab values. The creatinine value is notable for being taken at a slightly later time point. This single data set does not allow for analysis of longitudinal trends. More data is needed to establish meaningful trends.
