Medical Report: Patient 006-102786

1. Patient Information

* **Patient Unit Stay ID:** 893771 * **Unique Patient ID:** 006-102786 * **Patient Health System Stay ID:** 666844 * **Gender:** Male * **Age:** 66 * **Ethnicity:** Caucasian * **Hospital ID:** 155 * **Ward ID:** 362 * **Admission Height (cm):** 178 * **Admission Weight (kg):** 82.9 * **Discharge Weight (kg):** 85.4 * **Hospital Admit Time:** 12:52:00 (Hospital Admit Offset: -303 minutes from unit admit) * **Hospital Admit Source:** Floor * **Hospital Discharge Year:** 2014 * **Hospital Discharge Time:** 22:45:00 (Hospital Discharge Offset: 6050 minutes from unit admit) * **Hospital Discharge Location:** Home * **Hospital Discharge Status:** Alive * **Unit Type:** Med-Surg ICU * **Unit Admit Time:** 17:55:00 * **Unit Admit Source:** Floor * **Unit Visit Number:** 1 * **Unit Stay Type:** stepdown/other * **Unit Discharge Time:** 22:45:00 (Unit Discharge Offset: 6050 minutes from unit admit) * **Unit Discharge Location:** Home * **Unit Discharge Status:** Alive * **Admission Diagnosis (APACHE):** NULL

2. History

Insufficient data provided to generate a detailed patient history. The provided JSON only contains lab results, a single entry indicating a 'Not Performed' physical exam, and basic demographic and admission/discharge information. A complete history would require additional information such as chief complaint, presenting symptoms, past medical history, family history, social history, and medication history. This information is crucial for understanding the context of the patient's ICU stay and the reasons for the laboratory tests conducted.

3. Diagnoses

No diagnoses are explicitly listed in the provided data. The absence of an admission diagnosis in the `apacheadmissiondx` field suggests that either the diagnosis was not recorded or is not available in this dataset. Further clinical information is needed to determine the patient's diagnoses.

4. Treatments

No treatment information is available in the provided data. Details regarding medications, procedures, and other interventions are necessary for a comprehensive medical report. This section would normally include a detailed description of all treatments administered during the patient's ICU stay.

5. Vital Trends

NULL. No vital sign data (heart rate, blood pressure, respiratory rate, temperature, oxygen saturation) is included in the provided JSON.

6. Lab Trends

The provided data contains numerous lab results for various blood chemistries and hematology parameters. These results show multiple time points, allowing for the assessment of trends over the course of the patient's stay. However, without precise timestamps (beyond the offset from unit admission), a detailed analysis of trends is difficult. The lab results indicate fluctuations in several key indicators, including albumin, BUN, creatinine, and electrolytes. These require further interpretation in the context of the patient's clinical history and other diagnostic data. More information is needed to determine if the observed changes are clinically significant.

7. Microbiology Tests

NULL. No microbiology test results are provided in the dataset.

8. Physical Examination Results

The only physical exam entry indicates that a physical exam was not performed. This is unusual for an ICU admission and suggests a potential data entry error or incomplete record keeping. A detailed physical exam is essential for assessing the patient's condition and guiding treatment decisions. This lack of data significantly limits the completeness of this report.

Conclusion:

This report is severely limited by the insufficient data provided. The available lab data shows some potential trends in several key parameters, but a comprehensive analysis and interpretation are impossible without a complete medical history, diagnoses, treatments, and vital signs. The absence of a physical examination is a major concern.
