Patient Information

Patient ID: 004-24409 Patient Unit Stay ID: 410109 Patient Health System Stay ID: 350267 Gender: Female Age: 86 Ethnicity: Caucasian Hospital ID: 115 Ward ID: 242 Admission Height (cm): 170.2 Admission Time (24-hour): 17:36:00 Hospital Admit Source: Direct Admit Hospital Discharge Year: 2015 Hospital Discharge Time (24-hour): 10:52:00 Hospital Discharge Location: Skilled Nursing Facility Hospital Discharge Status: Alive Unit Type: Med-Surg ICU Unit Admit Time (24-hour): 07:54:00 Unit Admit Source: ICU to SDU Unit Visit Number: 2 Unit Stay Type: stepdown/other Unit Discharge Time (24-hour): 10:52:00 Unit Discharge Location: Skilled Nursing Facility Unit Discharge Status: Alive

History

Insufficient data provided to generate a detailed patient history. The available data only provides admission and discharge information and lacks details on presenting complaints, past medical history, family history, social history, and medication history. Further information is needed to complete this section. The admission diagnosis (apacheadmissiondx) field is currently empty. The lack of information on the patient's reason for admission to the ICU and their condition leading up to admission significantly limits the completeness of this report.

Diagnoses

NULL. No diagnoses are listed in the provided data. This section requires additional clinical information such as physician notes or diagnostic test results.

Treatments

NULL. No treatment information is available in the supplied dataset. This section requires detailed information about the medications, procedures, and therapies administered during the ICU stay. This could include details such as medication names, dosages, routes of administration, and the timing of procedures.

Vital Trends

NULL. No vital sign data (heart rate, blood pressure, respiratory rate, temperature, oxygen saturation) is provided. Time-series data on vital signs is crucial to assess the patient's physiological status during the ICU stay. Without this information, a vital trends analysis cannot be conducted.

Lab Trends

NULL. No laboratory test results are included. This section would typically contain time-series data on complete blood counts (CBC), blood chemistries (e.g., electrolytes, creatinine, glucose), and other relevant laboratory parameters, allowing for the assessment of trends in the patient's physiological state.

Microbiology Tests

NULL. No microbiology test results (e.g., blood cultures, urine cultures) are provided. This section would normally detail any cultures performed and their results, which are essential in identifying and managing infections.

Physical Examination Results

NULL. No physical examination findings are available. A detailed description of the patient's physical examination on admission and during the ICU stay would be necessary to provide a comprehensive medical report. This might include findings from cardiovascular, respiratory, neurological, and abdominal examinations, among others.

This report is incomplete due to the limited data provided. Additional clinical information is required for a thorough and accurate assessment of the patient's medical history and ICU stay.
